Addendum No. 1
Request for Bids #2019-2 – Food Service Conveyor Belts
Questions and Answers

The following questions were received prior to the April 25, 2019 deadline for the submittal of questions.

1. Are the conveyor belts required to be stainless steel?

No, the belt itself does not need to be stainless steel. Food items will be pre-packaged and will not sit directly on the conveyor.

2. Is the brace system depicted in the technical drawings only for where there are transition points or is it intended to cover the entire conveyor system?

The brace system is only for transition points. The brace system is required to prevent food displays from being caught on transition gaps.

Please note that bids must be submitted prior to 4:00 PM EST on Friday May 3, 2019.

Thank you,

Jordan Edmonds, FCCFA Staff Attorney
