The Franklin County Convention Facilities Authority (the “FCCFA”) is seeking submittals of qualifications to pre-qualify architecture and engineering firms to provide professional design and engineering services for FCCFA capital projects with professional design fees of \$50,000 or less. The FCCFA is seeking firms that have extensive experience overseeing a broad range of architectural and engineering projects.

BACKGROUND

The FCCFA is the owner/developer of the Greater Columbus Convention Center (“GCCC”), the Hilton Columbus Downtown Hotel, Nationwide Arena, and six parking facilities; all located in downtown Columbus, Ohio. Established by the Franklin County Commissioners in July 1988 pursuant to Chapter 351 of the Ohio Revised Code, the FCCFA is a special governmental unit governed by an eleven-member board appointed by the Franklin County Commissioners, Mayor of Columbus, and suburban mayors.

As owner/developer, the FCCFA is responsible for the improvement, management, and successful operation of these facilities. In addition, the FCCFA is responsible for ensuring the continued success and growth of the convention business within the Greater Columbus community. Both responsibilities are directly linked to the FCCFA’s continued investment in and support of services, resources, facilities, and community projects that enhance the use and improvement of the convention center, hotel, arena, and parking garages.

Architectural/Engineering Services Pre-Qualification

Through this RFQ the FCCFA seeks to pre-qualify architecture and engineering firms to provide professional design services for new construction, repair, renovation, and condition assessment projects with professional design fees of \$50,000 or less. Firms submitting a statement of qualifications in response to this RFQ will be eligible to be selected to provide professional design services for select capital projects commencing between May 2023 and May 2024.

Firms who were prequalified for 2022-2023 are required to provide submittals updating the firm’s information to maintain prequalification status.

SCOPE OF SERVICES

The professional design services to be provided by the pre-qualified firms will vary depending upon the specific needs of the project. Generally, professional design services will include but not be limited to:

- Programming & Schematic Design Services – the pre-qualified firm may be asked to provide those services necessary to solidify the program and prepare documents consisting of drawings illustrating the general scope, scale, function and relationship of project components for approval by the FCCFA. Engineering/design studies needed to support the proposed schematic design may also be required.

- Engineering/Design Development Services – the pre-qualified firm may be asked to provide those services necessary to prepare the approved schematic design documents, drawings and other documents detailing the size and character of each project, including architectural, structural, mechanical and electrical systems, materials and such other elements as may be appropriate. The firm will assist with the development of cost estimates associated with the design/engineering documents as presented.
- Construction Document Services – the pre-qualified firm may be asked to provide those services necessary to prepare all construction documents consisting of drawings, specifications and other documents setting forth in detail the requirements for construction of each project. The firm may also be required to prepare all documents needed to bid and contract for the construction of each project.
- Construction Contract Administration Services – the pre-qualified firm may be asked to provide those services necessary for the administration of construction contracts. The firm will help oversee the implementation of each project and ensure that the project is constructed in a manner that meets all design/engineering specifications and requirements. The firm shall review the progress of work and assist the FCCFA in evaluating the work of all project contractors.
- Additional Services – the pre-qualified firm may be asked to provide additional services, including, but not limited to: completion of design and engineering studies required to develop a project program; facility and capital equipment condition assessments; interior design review and development; criteria architect services for design-build projects; Real property civil surveys; commissioning services; construction materials testing services; and other consulting projects which may be required from time to time.

Potential projects may require the services of different engineering/design disciplines, including but not limited to civil, environmental, geotechnical, structural, electrical, fire protection, landscape, traffic, and mechanical engineering services. Firms should identify the discipline(s) for which they are best qualified to provide the requested services.

As used within this RFQ, professional design services, means services within the scope of practice of an architect or landscape architect registered under Chapter 4703 of the Ohio Revised Code, or a professional engineer or surveyor registered under Chapter 4733 of the Ohio Revised Code.

SELECTION PROCESS and EVALUATION CRITERIA

The FCCFA will review, evaluate, and pre-qualify each Architect or Engineer (“Respondent”) that responds to this RFQ. The most qualified firm will then be selected for each project requiring professional design services valued at less than \$50,000. The FCCFA reserves the right to select one or more firm(s) depending upon the qualifications submitted and the requirements for the project. Pre-qualification does not guarantee that the Respondent will be selected by or engaged

by the FCCFA for any future projects. The FCCFA does not require any form of fee estimate, fee proposal, or other estimate or measure of compensation prior to pre-qualification.

Pre-qualified firms will be eligible to be engaged by the FCCFA to provide professional design services for projects commencing between May 2023 and May 2024.

In no particular order of priority, the criteria used for selection of pre-qualified firms to provide the required professional design services for each project will include, but not be limited to:

- Experience of the professionals that will work on the project;
- Scope and nature of the services the firm will provide;
- Availability of personnel, equipment, facilities, and other resources to perform the services within the required timeframe;
- Experience of the firm to complete design/engineering services as needed for each project as well as the firm’s demonstrated knowledge and understanding of essential requirements involved in providing the services requested;
- Proposed technical approach to providing professional design and engineering services; and
- Quality of references.

Pre-qualified firms considered for a specific project may be asked to identify additional qualifications and availability of personnel, specific consultants, if any, and project approach prior to contract award.
